(Emergency Repair e.g. heating issue, pipe or roof leak etc.)

Preventative Measures: Protecting Your Home From Freezing Temperatures

1. Guard your water pipes: Keep outdoor plumbing from freezing. Disconnect garden hoses and store them away. Leave the kitchen cabinet door and bathroom vanity door open where the pipes are located to keep them warm over night.

2. Seal holes and cracks: Foam insulation is great to close up entry points of freezing air around windows and door jams.

3. Know where the water shut off valve is: If your water lines were to freeze or burst you will need to shut off your homes water supply. Keep the area easy to access in case of emergency.

4. Clean your gutters: Full gutters increase your chance of having ice form on your roof, which could lead to more damage.

5. Keep the heat in the house: Add plastic film to insulate your windows, add a door draft stopper to prevent freezing air coming through the cracks, make sure your heating vents are open, keep interior doors open to let heat flow evenly, open curtains on a sunny day.

Process for Maintenance Repair Request
