Outdoor Home Maintenance

Gutter need to be cleaned at least twice a year. Check siding for any cracks or broken pieces and clean the exterior of the home annually. Do not stack debris against the house, it voids your home insurance. Keep an eye on your deck if it

is soft or you see hole developing from insects. Check dryer ducting make sure there is no debris or small birds nest, it is a fire hazard. If you don't notice much exhaust, you may have a blockage, vacuuming the vent will also help the dryer's performance.

Dishwashers

Dishwashers work by spraying water out of their spinning arms onto the dishes inside. When those arms aren't spinning properly or the holes in them are full of buildup, your dishes won't be getting thoroughly cleaned. Check to make sure that the arms spin correctly and clean out any debris that has accumulated inside the holes with a small piece of wire, a toothpick, or small pliers. At the very bottom of your dishwasher is the drain, and this area can be a common place where food debris, buildup, and other matter can end up. Leaving these obstacles near the drain will eventually create a clog. When your dishwasher drain is clogged, it will become less efficient and have a harder time cleaning. Use an Acid to Remove Buildup by using white vinegar or lemon juice.
