# Preventative Measures: Plumbing

## Plumbing

- Inspect all visible pipes for corrosion, if you notice any signs of corrosion on your pipes, whether it's blue/green deposits or rust, this is a sign that you will have a leak on your hands soon.
- Examine toilet tanks remove the lid off of your toilet tank and inspect for any signs of wear.
- Maintain your hot water tank every year, flush your water heater. Turn the water shut off for hose bibb in the winter and remove the hose; if this is not done it is possible for the frozen pipe to burst. If any leaks occur use your water shut off valve.
- Do not flush anything other than toilet paper down.
- **Do not drain any Fats, Oils, or Grease (FOG) down any drain, this will clog and cause backup to your home and in the city drains.**
- **Check for leaks around your hot water tank, kitchen sink, dishwasher, bathroom sink, laundry sink and washer machine.**
- Check the caulking around showers/bathtubs and sinks if it cracked or wore away reseal with more caulking. If you have poor water pressure out of a faucet, the aerator is the likely culprit and it can be easily fixed. Be aware of the location of all the shut off

## Preventative Measures: Ants

### What is the best way to stop ants getting in the house?

- ⇒ Keep surfaces in and around your home clean and make sure to wipe down the counter tops and tables.
- ⇒ Store food in sealed containers
- ⇒ Seal off cracks and entrances to your home, for example loose baseboards, or window frames
- ⇒ Remove ant trails by sweeping and mopping daily.
- ⇒ If possible, set out ant bait around your home. Some examples that are available at your grocery store or hardware store: Ant Be Gone disks, Raid Traps, Terro Ant Steaks.
- ⇒ Borax has a long track record against indoor ants. Mix Borax with a little sugar and water and soak a cotton ball to make a syrup that ants will consume.
