Protect yourself from wildfire smoke

Climate change is increasing the risk of wildfires. Wildfire smoke can be dangerous to our health. Here are some ways to keep you and your loved ones safe.

Limit Exposure

Take it easy. The more active you are, the harder it is on your lungs.

Stay indoors and keep windows closed, if it's safe to do so.

If possible, wear a fitted 3-layer cloth or disposable mask to filter smoke.

Take Care

Drink lots of water to help your body cope with the smoke.

Check the air quality forecast to know when to expect smoky skies.

Check on others, especially those who are more sensitive to smoke.

How wildfire smoke affects your health

Most symptoms from smoke are mild and will go away when the smoke clears. Seek prompt medical attention if you experience severe symptoms such as:

- Shortness of breath
- Chest pain
- Severe cough
- Racing heart
- Dizziness

FUNDING AVAILABLE FOR YOUTH SPORTS & SUMMER ACTIVITIES

Chief George has received many requests for support with youth sports and summer activities, and has secured funding assistance for eligible families.

At KFN, we recognize the important role that sports, recreation, and cultural activities play in the healthy development of our children and youth. Participation in these activities supports physical health, mental wellness, self-esteem, teamwork, leadership skills, and a strong sense of belonging. We also understand that the costs associated with registration, equipment, travel to cultural events, and programs can create challenges for families.

We do not want financial barriers to prevent our children and youth from accessing these valuable opportunities. KFN is committed to supporting families who are encouraging healthy, active lifestyles for their children.

Consistently attending scheduled sessions lay the groundwork for the essential, and sometimes challenging, work involved in your treatment.
